

Reiki and Seichem Healing Courses at [sportsclinic+]

Tera Mai Seichem healing includes Reiki, (earth) also has Sophi-el (water), Angelic Light (air & spirit) and Sakara (fire).

Further information regarding all four elemental healing rays can be found under reiki and seichem on www.sports-clinic.co.uk.

Attunements:

In order to channel these healing energies, you must be attuned to them by a Tera-Mai Master Sports-clinic's resident master is Kirsty Smith. Being attuned to the elemental healing rays, accelerates your personal and spiritual growth and development.

In order to assimilate the energies, the attunements are taken in three stages, called degrees...

Level I course (first degree attunement) students will be attuned to all four elemental healing rays, allowing you to work on yourself, friends and family, pets and plants. This is a one day course which will include study, attunement and practice. Each student will receive a session from the Seichem Master-Teacher to understand how the healing feels to receive.

Level II course (second degree attunement) enables students to channel stronger energy quicker. You will be introduced to using symbol and taught how to perform absent healing (sending healing through time and space). This 2nd attunement will allow you to become a practitioner of healing.

Level III (third degree) is Mastership level and is a very powerful initiation. Many experience greater spiritual and psychic awareness as a result. Please contact Seichem Master for information on this course.

Although it is preferred that students are initiated to first degree Seichem then allowed to go and have fun with it, before being initiated to second degree, a two-day course is available, as long as the student has previously studied Tera Mai Reiki/Seichem principles. Further information including price list can be found at www.sports-clinic.co.uk.

Please specify when booking if you want to be attuned only to Reiki.

You can contact Sportsclinic by telephone on:
